

PHATSIMO PHEKO

Cybersecurity Consultant | SOC Analyst — Security Operations & SIEM (Wazuh) | Detection Engineering | OCI Certified
Gaborone, Botswana | +267 770 289 08 | phatsimopheko11@gmail.com | [LinkedIn](#) | [phatsimopheko.com](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity consultant with hands-on experience in SOC operations, SIEM deployment, and security event monitoring using Wazuh across cloud and on-premises environments. Performs daily threat detection, alert triage, log analysis, and incident response, and authors internal documentation standardizing security reporting methodology. Deepens this experience through a self-directed, published detection engineering lab series — investigating SIEM rule logic, mapping findings to MITRE ATT&CK, and engineering custom detection rules to close real coverage gaps. Holds three OCI 2025 certifications spanning cloud security, infrastructure architecture, and observability, with a software development background that sharpens an application-security perspective. Actively developing toward a cloud security engineering role at the intersection of security operations and cloud infrastructure.

FEATURED PROJECT — WAZUH DETECTION ENGINEERING LAB SERIES

A self-built, ongoing SIEM lab series (phatsimopheko.com/labs/wazuh-labs), progressing from SOC platform deployment through custom detection rule engineering.

- Deployed a Wazuh SIEM environment and configured file integrity monitoring and Windows security telemetry across constrained hardware.
- Identified that Wazuh's default rules aggregate authentication failures by source IP rather than username distribution — meaning brute-force and credential-stuffing attacks produce identical alert signatures out of the box.
- Engineered and deployed a custom correlation rule, mapped to MITRE ATT&CK (T1110.004), to close that detection gap — closing a coverage blind spot the series itself had identified.

EXPERIENCE

SOC Analyst / Cybersecurity Consultant

October 2023 – Present

TechBulls Botswana | Gaborone, Botswana

- Deployed and configured Wazuh SIEM in a SOC environment, managing agent deployment, log ingestion, and endpoint security monitoring across client infrastructure.
- Perform daily alert triage and security event analysis across 100 endpoints, investigating potential threats, assessing impact, and escalating incidents through defined response workflows.
- Produce independent SecOps reports detailing threat detection findings, alert severity, and remediation recommendations.
- Authored internal documentation standardizing the security reporting methodology, improving consistency and quality across daily incident reports.
- Coordinate incident response workflows with clients during security events, including agent disconnections and anomalous endpoint activity.
- Monitor client asset health and network security posture continuously, maintaining full endpoint visibility and supporting vulnerability management processes.

Tech Support Intern

January 2020 – August 2020

Botswana Accountancy College | Gaborone, Botswana

- Delivered technical support to staff and students, resolving hardware, software, and network security issues; supported network monitoring, troubleshooting, and IT security onboarding for new staff.

EDUCATION

BSc (Honours) in Computer Systems Engineering

University of Sunderland

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Oracle Cloud Infrastructure 2025 Certified Architect Associate
- Oracle Cloud Infrastructure 2025 Certified Observability Professional

TECHNICAL SKILLS

Security Operations: SIEM Deployment & Configuration (Wazuh), Detection Rule Engineering, MITRE ATT&CK Mapping, Alert Triage, Threat Detection, Log Analysis & Correlation, Security Event Monitoring, Incident Response, Endpoint Security, Vulnerability Management

Cloud Security: Oracle Cloud Infrastructure (OCI), Identity & Access Management (IAM), Cloud Security Monitoring, Cloud Observability, Cloud Infrastructure Architecture

Network Security: Network Security Monitoring, Network Traffic Analysis, SOC Operations, Threat Detection Lifecycle

Reporting & Documentation: Security Incident Reporting, SecOps Report Analysis, Remediation Documentation, Security Policy Writing

Software Background: JavaScript, React, Next.js — informs an application-security perspective on detection and secure design

Tools: GitHub, Figma, MySQL, OracleDB, SQLite
